

**TEST BELONGS TO:**

Name: **John Smith**      Age: 63      Date of Birth: 08-Jul-1953      Sex: Male      TeloYears Customer ID #: 172-5307-124  
 Sample Collected on: 30-Mar-2017      Received on: 02-Apr-2017      Reported on: 17-May-2017      Accession #: AA-123456  
 Health Provider: Jane Doe      Clinic: Acme Clinic      Clinic Phone #: 555-987-6543      Clinic ID #: 1234

**ABOUT THIS TEST:**

TeloYears is a genetic test that measures the length of your telomeres, the dynamic, protective caps on the ends of your DNA strands that tend to shorten with age. The test provides your Average Telomere Length (ATL) as well as your current age in TeloYears, or your "cellular" age based on your telomere length. Your age in TeloYears is the actual age of a typical man or woman whose telomere length is similar to yours.

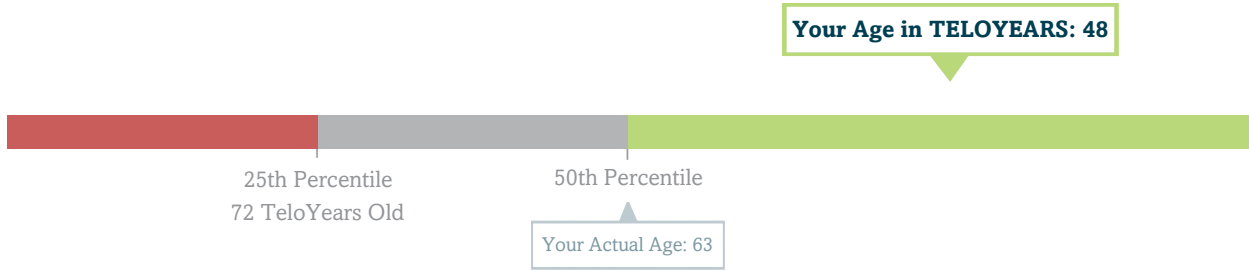

**YOUR RESULTS:**

Your Average Telomere Length is **1.02** (T/S ratio) which puts you in the 76th percentile. This means that your telomeres are longer than 76% of men your age.<sup>1</sup>

**INTERPRETING YOUR RESULTS:**

You are **51** years old in TeloYears. Based on the length of your telomeres, you are **YOUNGER** than your actual age.

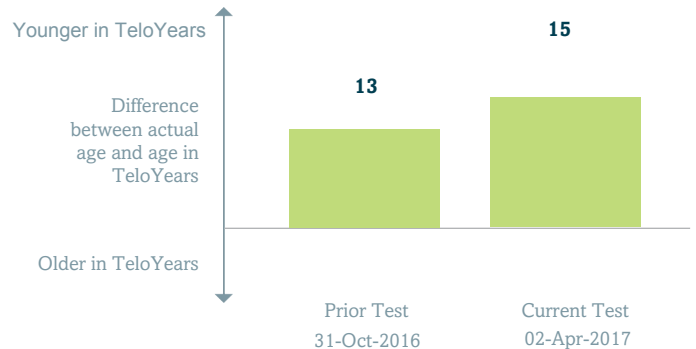

**YOUR TELOYEARS RESULTS OVER TIME:**

This is your TeloYears test.

Your Actual Age  
**63** years old

---

Based on your telomere length, you are:  
**48** **TELOYEARS** old

**WHAT NOW:**

- Explore the TeloYears Blueprint for Aging Well provided with this report for insights and information on how to get the most out of your TeloYears results. Consult your doctor before engaging in any diet, exercise, or lifestyle modification program.
